DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of group I in the reply filed on 3/23/05 is acknowledged. The traversal is on the ground(s) that the search of the claims should be searched together and the Examiner has not demonstrated, by appropriate explanation, that search of the claims Groups I and II, together, would constitute a serious burden. After a careful reconsideration of this application, the Restriction Requirement of the previous office action is withdrawn.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-42 are rejected under 35 U.S.C. 102(e) as being anticipated by Davis et al. (6,074,413). Davis et al. disclose a wrap having plurality of nodules (74) extending inward from the interior surface of the layer (60), and the wraps incorporate a component such as a separate substrate layer or incorporated into at least one of the continuous layers medicament as claimed (col. 18, line 65 to col. 19, line 16). The steps of the method as claimed are inherently carried out as the wrap of Davis et al. being used.
